

Intern Projects – Summer 2020

Sun Safety Initiative

LINCS (Local Information Network Communication System) Partner Update

Social Media Content Development and Analysis

Immunization Community Outreach Initiative

Access and Functional Needs (AFN) Communication Tools

Sun Safety Initiative

SCOPE

The person assigned to this project would be directly involved with outreach efforts designed to increase sun safety and awareness in our county's municipalities. Candidates should be highly organized and creative with good communication skills, and comfortable with public speaking. Bilingual Spanish a plus, but not required.

MEASURE

Survey sample groups to assess general sun safety awareness and develop educational outreach targeted for use in municipal libraries.

CONTACT

The project lead for this program is health educator, Lori Karabinchak.

LINCS (Local Information Network Communication System) Partner Update

SCOPE

The person assigned to this project would assist in the creation, updating, and/or maintaining of the Local Information Network and Communications System Program's contact database. Candidates should be detail-oriented and proficient with database management.

MEASURE

Through research and refinement of state databases and public records, as well as outreach efforts, track number of new partners enrolled and/or updated in CHAIN group.

CONTACT

The project lead for this program is LINCS Coordinator, Carrie Johnson.

Social Media Content Development and Analysis

SCOPE

The person assigned to this project would assist in the creation of social media content for health-related topics and initiatives. Candidates should be creative, possess good communication skills.

MEASURE

Conduct a quantitative gap analysis of time and resources dedicated towards social media development and actual content published.

CONTACT

The project lead for this program is Social Media Liasion, Carrie Johnson.

Immunization Community Outreach Initiative

SCOPE

The person assigned to this project would be directly involved with outreach efforts designed to increase awareness about immunizations in our county's municipalities. Candidates should be highly organized and creative with good communication skills, and comfortable with public speaking. Bilingual Spanish a plus, but not required.

MEASURE

Survey sample groups to assess general immunization knowledge and develop educational outreach targeted for use in municipal libraries.

CONTACT

The project lead for this program is health educator, Lori Karabinchak.

Access and Functional Needs (AFN) Communication Tools

SCOPE

The person assigned to this project would be directly involved with research and development of communication tools designed to increase communication with and among AFN populations. Candidates should be highly organized and creative with good communication skills. Bilingual Spanish a plus, but not required.

MEASURE

Survey target groups to assess functionality and effectiveness of tools in simulated public health emergency situations.

CONTACT

The project lead for this program is Special Operations Chief, Eileen Marcinczyk.
